

MECHATRONICS ENGINEERING

VISION

To attain excellence in academics, research and technological advancement in Mechatronics Engineering with a concern for society.

MISSION

To impart high quality professional education and produce Mechatronics Engineers with all round knowledge of multi-disciplinary branches of Engineering and Technology. To foster skill sets required to be a global professional in the areas of automation, intelligent systems, robotics, research for technology management and to fulfill the expectations of industry and needs of the society. To inculcate entrepreneurial qualities for creating, developing and managing global engineering ventures.
